How to arrive and move around

The quickest and most convenient way to move around the area is by private mobility, due to the special configuration of the region and very limited public services.

All most famous places are close between each other, nevertheless, main centers are pedestrian areas and larger cars are not indicated to across narrow roads typical of South of Italy.

We can offer the easiest and most convenient solution to reach any place at any time of the day, including isles.

Main Airports

Napoli 35Km - 60min by car

Rome 220Km - 165min by car

Main Train Station - Napoli Centrale

On land mobility - Transfers and Tours

Nothing better than a warm welcome upon landing after a long flight, being sure that your trusted driver is waiting for you at the arrival gate, ready to assist with luggage and to go the next destination.

If you will be reaching Sorrento or the Amalfi Coast, the car ride will be a pleasant drive with the possibility to admire the bay of Naples surmounted by mount Vesuvius and the stunning Sorrentine Coastline on the way to your next destination. The isles of Ischia and Procida

On the northern side of the bay of Naples, the isles of Ischia and Procida are incredible destinations deserving to be discovered by land and sea.

Ischia is the largest isle of the Archipelago, and is mostly famous for the Aragonese Castle, a stunning fortress from the middle age and for the natural hot water springs overflowing from the ground used at the various SPA complex on the isle.

Procida is the smaller isle of the bay and tourism is still natural and authentic, highlighting the ancient local heritage, traditions and recipes only made with products from the isle. The colorful village “La Corricella” is the main attraction on the isle.
